

## Techrider and Lightplan Diabolo Act

### Techrider Diabolo:

For the act we need an unobstructed space of at least 4x4x4 meters. Also smaller stages are possible after consultations. We provide our music in form of USB, Laptop or CD. We bring all requisites by ourselves and don't need any setups, also no microphone is needed.

### Lightplan „Diabolo“ (10-15 minutes preparation time):

<u>time:</u>	<u>action:</u>	<u>light:</u>
00:00-00:23	M. and B. walk on stage from left and right side.	dimmed blue light, so that you can see the silhouettes.
00:23-3:33	Main showact, diabolo juggling. Using the whole stage.	Jugglinglight 70% bright airspace above M. and B., warm withe/amber light, not dazzling also white from behind and the sides, blue/green background light if possible.
03:07-03:17	Passing 5-7 LED Diabolos	Total blackout
03:33-04:32	One vertical LED Diabolo shoots out of the left suitcase	UV and blue light, it should still be possible to see the faces.
04:32 until we leave the stage	bow	Warm withe light respectivly coolest light of the technician.

Posinglight (frontal spot / juggling light 100%): 01:05, 01:39, 02:15, 03:18, 04:08-04:10 (Slowmotion part), 04:32

If there are any question don't hesitate to contact us. We are looking forward to having a great show with you!
